

# Assessment of focus areas of Latvenergo AS donations

The survey was conducted by the research company Kantar from 16 April to 10 May 2019, surveying 802 Latvian residents aged 18 to 74 using a computer-assisted telephone interviewing method.

Base: Respondents who have noticed Latvenergo as a donor in the particular focus area; see 'n' in the chart

\* Average assessment on a scale from 1 (Very negative) to 4 (Very positive)

**Total average assessment 2019 = 3,3** (2018 – 3,2)  
(on a 4-point scale where 4 is the highest positive assessment)
